**Why use HSPA?**

The HSPA Wireless-N Router allows you to set up your own wireless hotspot with a 3G/3.5G USB modem\* wherever you are - at home, office, school or your favourite cafe. It is especially for users who do not have a fixed DSL or cable connection but still need to be connected to the Internet.

What's more you can now share this personal hotspot with your friends and colleagues, making it a cost-effective solution for you.

This HSPA Wireless-N router allows you to connect to up to four notebooks or desktop PCs via Ethernet.
